Date / Time:

Place: Castle Market

Transcription

Time		
	Thomas	Do you have a fondest memory of the market?
	Collinson	Well I've been living in Sheffield for 30 years and I find it was a nice place the market, pleasant, you could sit down and have a nice cup of tea and nice people to serve you.
00:23	Thomas	Do you think that the managers could do anything to improve the market?
	Collinson	Oh yes, very much so because I think it needs a lot of tidying up and a lot of different things done to it. But of course this is coming down this place and it'll not be so good, but in the meantime its quite good and service is very good and as I say there's nothing more only everything changes with life doesn't it.
00:56	Thomas	Do you think the stalls in here offer enough of a variety?
	Collinson	The stalls here, no there's not much of a variety at all and they could be displayed out much better.
01:12	Thomas	Do you think this is too complicated
	Collinson	In here?
	Thomas	Yes, do you find it hard to make your way around to places?

Castle Markets Project - Oral History

Interview Transcription

	Collinson	Oh no its not complicated because you only walk round and you're at the other side. No its not complicated here at all but I don't think, it needs a lot of improvement but its not going to stay open anyway. It need s a lot of improvement and things like that but apart from that its not too bad at all.
01:51	Thomas	Do you have a favourite stall in the market?
	Collinson	Well I go to the butcher's stall which is the better one, the meat is very nice and the've clean overalls on which is very nice and everything' displayed out nicely and I like to go there because I know I'll be getting good meat because some of the places go and they just throw it in and just throw it out and that's no good, not very good that.
	Thomas	Right, I think
